Investment Plans

We have two types of staking plans with different periods and percentages of profitability

Plan Type NO.1 (orange) - Withdraw profit **any time**

- **Plan 1** - (14 days) - 8% per day - 112% profit
- **Plan 2** - (21 days) - 6.5% per day - 136.5% profit
- **Plan 3** - (28 days) - 5% per day - 140% profit

Explanations:

1. Starting percentages (what you see on the slide) **increase every day by 0.5%**
   For example: on plan 1 on day 20 of the project, the starting percentage will already be equal to **18% per day** (20 *0.5 + 8)
2. The percentage is fixed at the start of the plan.
   For example: on the 12th day of your plan, the percentage will be the same as it was at the very beginning of its work.

Investment Plans

We have two types of staking plans with different periods and percentages of profitability

Plan Type NO.2 (blue) - Withdraw profit end of plan **+ use auto-compounding**

- **Plan 4** - (14 days) - 8% per day - 193% profit
- **Plan 5** - (21 days) - 6.5% per day - 275% profit
- **Plan 6** - (28 days) - 5% per day - 292% profit

Explanations:

1. Starting percentages (what you see on the slide) **increase every day by 0.5%**
2. This plan type **use auto-compounding** (every day) to calculate the percentage of profit.
   example: in 1 day you get, + 8% for the amount of 1 BNB = 1.08 BNB. On the second day, you will already receive 8.5% on the amount from the previous day 1.08 * 8.5% = 1.1718 BNB. The next day, 9% on the amount of the day passed, and so on.
3. The pro fit percentage is growing every day.
